1. Purpose

This Acceptable Use Policy (AUP) outlines detailed and comprehensive standards for the acceptable use of Leeds International School's information technology resources. The goal is to promote responsible digital behavior, protect institutional data, and mitigate the risks of cyber threats. This document categorizes responsibilities and expectations across four key user groups: Top Management, IT Staff, Teachers, and Students.

2. Scope

This policy applies to all Leeds International School stakeholders across all branches who access or use any IT systems including desktops, laptops, mobile devices, servers, software, LMS, email, cloud services, and internet.

3. Policy Guidelines by Category

3.1 Top Management

Acceptable Use

- Use IT systems solely for academic leadership, strategic planning, and communication.
- Ensure decisions regarding IT budgeting, cybersecurity implementation, and data governance align with institutional policies.
- Participate in cybersecurity awareness sessions.

Unacceptable Use

- Delegating account access or using unmonitored personal accounts for school-related activities.
- Failing to enforce security practices across managed branches.
- Storing institutional data on unsecured personal devices or cloud accounts.

Responsibilities

- Promote and model compliance with cybersecurity policies.
- Authorize response actions during IT incidents.
- Support investment in IT resources and security enhancements.
- Ensure all digital data shared within management is encrypted or secured via authorized tools.

3.2 IT Staff

Acceptable Use

- Perform regular system updates, threat detection, patch management, and vulnerability assessments.
- Maintain backups and business continuity plans.
- Use administrative privileges responsibly for installation, auditing, and monitoring.

Unacceptable Use

- Sharing elevated access rights with non-IT personnel.

- Installing or using cracked/pirated software or tools.
- Circumventing or ignoring audit logs and monitoring systems.

Responsibilities

- Maintain security logs and user activity records.
- Report any breach or suspicious activity immediately.
- Configure and maintain endpoint protection (EDR, firewall, antivirus).
- Enforce endpoint encryption, VPN connectivity, and remote access security.
- Standardize software and toolkits across branches to reduce vulnerability.
- Develop clear user manuals for staff and students.

3.3 Teachers

Acceptable Use

- Access LMS, student records, and communication tools only for instructional or academic purposes.
- Maintain digital hygiene by logging out of systems and updating passwords regularly.
- Store academic material on authorized platforms (e.g., Google Drive under leeds.lk domain).

Unacceptable Use

- Using personal or unlicensed applications for school communication.
- Allowing students to access their devices without supervision.
- Saving confidential student information on external drives or personal email accounts.

Responsibilities

- Protect login credentials and enable MFA if applicable.
- Ensure digital assessments and communications comply with school privacy standards.
- Use only school-approved tools and platforms for student engagement.
- Report suspected plagiarism, cheating, or cyberbullying encountered in digital platforms.

3.4 Students

Acceptable Use

- Use school networks, apps, and computers for educational tasks, including research, learning, communication, and project collaboration.
- Log into student portals and learning systems with their own assigned credentials.
- Attend online classes in accordance with conduct and dress code policies.

Unacceptable Use

- Attempting to bypass school network filters or firewalls.
- Using school internet for streaming, gaming, or social media without educational purpose.
- Downloading or distributing unauthorized material (music, video, software).

Responsibilities

- Attend digital citizenship and internet safety awareness programs.
- Keep login credentials private and report lost devices or credentials.
- Adhere to online etiquette (netiquette) during remote or hybrid classes.
- Respect the intellectual property of others and avoid plagiarism.

4. General Usage Rules (Applies to All Users)

- All devices must have updated antivirus and security software.
- All users must follow the data classification policy and handle confidential information accordingly.
- No one shall access another user's account, data, or files without permission.
- Any attempt to hack, damage, disable, or alter systems and services will be treated as a disciplinary offense.
- Internet activity may be monitored and logged.
- All removable media must be scanned before use.

5. Enforcement and Sanctions

- Temporary or permanent revocation of access privileges.
- Disciplinary procedures up to termination or expulsion.
- Legal action in case of serious violations.

6. Acknowledgment of Compliance

All users are required to acknowledge this policy in writing (physical/digital form). Access to IT services will only be granted upon receiving signed acknowledgment.
